1x

Befestigung / Attachment:

Die „Hygiene – Spuck – Schutzwand“ muss entweder mit dem Trägermaterial verklebt werden (hierfür empfehlen wir den Kleber **XXX** von Tesa), oder für eine noch höhere Standfestigkeit mit dem Trägermaterial verschraubt werden (4 Schrauben pro „Hygiene – Spuck – Schutzwand“, nicht im Lieferumfang enthalten).

The „Hygiene-Spuck-Schutzwand“ has to be agglutinated with the base support material (we recommend using **XXX** Tesa), or, for better stability, be bolted to the base (4no screws for each unit, not provided with delivery).

XXX = Versuch steht noch aus
